[Web Portfolio](#)

SUMMARY

Data Scientist & ML Engineer with 1 year of hands-on experience in data analysis and predictive modeling. Skilled in developing end-to-end machine learning projects — from data preprocessing to model implementation. Passionate about creating impactful, data-driven solutions that solve real-world challenges.

WORK EXPERIENCE

Freelance Machine Learning Engineer | Upwork

Dec 2025 – Present

- Engineered end-to-end data preparation pipelines, executing advanced data preprocessing, missing value imputation, and feature scaling techniques to optimize datasets for predictive modeling
- Developed, fine-tuned, and evaluated various machine learning models tailored to specific client requirements, delivering actionable data-driven solutions that resolved complex business challenges.

Machine Learning Trainee | Digital Egypt Pioneers Initiative (DEPI) - Microsoft Track

Jun 2026 – Present

- Designed and evaluated diverse machine learning algorithms, focusing on model optimization, hyperparameter tuning, and cross-validation techniques to achieve robust predictive performance.
- Collaborated on intensive applied data science projects, utilizing modern ML frameworks to solve complex analytical tasks and streamline model deployment workflows.

SELECTED PROJECTS

Credit-Card-Default Prediction

[GitHub Repository](#)

- Developed a robust classification model to predict the probability of credit card default for 30,000 clients, enabling financial institutions to proactively identify high-risk customers and mitigate potential credit losses.
- Processed and analyzed multivariate financial datasets, performing comprehensive Exploratory Data Analysis (EDA) and feature engineering using Python (Pandas, NumPy) to extract key risk indicators.
- Built and evaluated baseline machine learning models using Scikit-Learn, and implemented advanced Deep Learning architectures utilizing TensorFlow and Keras to maximize predictive accuracy and recall.
- Tech Stack: Python (Pandas, NumPy), Scikit-Learn, TensorFlow, Keras.**

EDUCATION

- SadatAcademy For Management Sciences - Computer Science, Level 3 | Student
- GPA:3.64**

Skills

C++ | Python | JavaScript | CSS | HTML | Streamlit | Anaconda | MySQL | Keras | Matplotlib
mlflow | NumPy | Pandas | Plotly | PyTorch | scikit-learn | TensorFlow | GitHub | Power BI

ADDITIONAL INFORMATION

- Languages:** Arabic, English
- Certifications:** IBM Data Science Professional Certificate, Python for Data Science & AI, Data Analysis with Python, Machine Learning with Python, Applied Data Science Capstone – IBM / Coursera (2025).
